MINI-ASSESSMENT

Multi-Step Prompt Workflow

Name: P.Prem Kiran **Reg No:** 99230040709

1. Workflow Title

Social Media Content Planning Workflow

2. Objective

Design a multi-step AI prompt workflow that takes a brand's goals and target audience as input, analyzes content needs, generates ideas, prioritizes them, and produces a final content calendar. The workflow is completed entirely through an AI interface without building code.

3. Workflow Overview

Step	Task	Output
Step 1	Collect & Structure Brand Input	Structured brand goals and audience data
Step 2	Analyze Audience & Content Gaps	Audience insights, content themes, gaps
Step 3	Prioritize Content Themes	Ranked content themes
Step 4	Generate Post Ideas	Practical post concepts per theme
Step 5	Create Final Content Calendar	Prioritized content calendar

---

Step 1 — Collect & Structure Brand Input

Prompt: You are a social media planning assistant. Ask the user to provide the brand name, platform(s), target audience, marketing goals, and any existing content performance data. Do not generate content ideas yet.

- **Input:** Brand goals and audience details

- **Output:** Structured brand and audience profile

Step 2 — Analyze Audience & Content Gaps

Prompt: Analyze the brand and audience data from the previous step. Identify the audience's key interests and pain points, current content themes being covered, and content gaps or underused opportunities. Present the results in a structured format.

- **Input:** Data from Step 1
- **Output:** Audience insights, content themes, and gaps

Step 3 — Prioritize Content Themes

Prompt: Based on the analysis from the previous step, identify the most valuable content themes to pursue. Rank the themes according to audience relevance and potential impact on engagement and brand goals. Do not create specific post ideas yet.

- **Input:** Analysis from Step 2
- **Output:** Prioritized content themes

Step 4 — Generate Post Ideas

Prompt: For each prioritized theme identified in the previous step, generate practical post concepts. Consider content format (image, video, carousel, text), platform fit, audience appeal, and effort to produce. Provide one or more ideas per theme.

- **Input:** Prioritized themes from Step 3
- **Output:** Recommended post ideas

Step 5 — Create Final Content Calendar

Prompt: Create a final content calendar based on the themes and post ideas identified in the previous steps. For each entry, include the theme, post idea, content format, platform, priority level, and suggested posting timeframe. Present the final result in a clear table.

- **Input:** Themes and post ideas from Steps 3–4

- **Output:** Final content calendar

---

4. Workflow Flow

Brand Goals & Audience Data

↓

Step 1: Collect & Structure Brand Input

↓

Step 2: Analyze Audience & Content Gaps

↓

Step 3: Prioritize Content Themes

↓

Step 4: Generate Post Ideas

↓

Step 5: Create Final Content Calendar

↓

Final Content Plan

5. Expected Final Result

The workflow transforms raw brand and audience input into structured insights, prioritized content themes, practical post ideas, and a clear content calendar. Each step uses the output of the previous step, creating a complete multi-step prompt workflow that can be executed in an AI interface.

6. Conclusion

This prompt workflow demonstrates how AI can be used to systematically plan social media content and support marketing decisions. The workflow is prompt-based and requires no programming or code.
